Project Design Phase-II Customer Journey Map

Date	18 October 2022		
Team ID	PNT2022TMID36292		
Project Name	Natural Disasters Intensity Analysis And Classification Using Artificial Intelligence		
Maximum Marks	4 Marks		

CUSTOMER JOURNEY MAP

Document an existing experience

Narrow your focus to a specific scenario or process within an existing product or service. In the **Steps** row, document the step-by-step process someone typically experiences, then add detail to each of the other rows.

As you add steps to the experience, move each these "Five Es" the left or right depending on the scenario you are documenting.

Natural disasters intensity analysis and classification using Al	Entice How does someone initially become aware of this process?	Enter What do popple experience as they begin the process?	Engage In the core moments in the process, what happens?	Exit What do people typically experience as the process finishes?	Extend What happens after the experience is over?
What does the person (or group) typically experience?	Users become aware of the Al model through the adventisements and social media Users become aware of this model through the government and nature protecting agencies	Video frames captured for the intensity analysis the disasters	Classifies the natural disaster and tells the hieroristy of disaster Classifies the natural disaster and tells the hieroristy of disaster Configuration of the property of the natural disaster and the natural disaster an	Determination of the nature and to alert people if extent of disaster and disaster is predicted disaster is predicted.	Establishing link with government Holpline, Awareness and organizations for Miligation Actualing Systems
Interactions	Interaction with people who are familiar with product	Use of hardware on screen interfaces to communicate technical experts	Interaction with scientists and disaster analysers monitoring	Communicate their feedback to service providers Contact the helpline in case of disaster detection	Interaction with the government agencies for taking appropriate of the people to functions spread awareness spread awareness
Goals & motivations At each step, what is a person's primary goal or motivation? ("Help me" or "Help me avoid")	Simple user friendly Ul To gain knowledge in the field of natural disaster classification	To make full use of the functionality of the model of the	Improved response time Accurate prediction	Examining the numbers of fatalities, injuries	Ensuring better service to customers Improvisation based on feedback provided
Positive moments What steps does a typical person find enjoyable, productive, fun, motivating, delightful, or exciting?	Motivated to save human and and calculations for property disaster classification	Delightful user interface experience learning nocet using the possibility of a possibility	Designing light weight Web Application of model	Periodic forecasting without interruption definition and climates	Examining the financial damage caused Implementing Helpline, Awareness and Threshold Actuating Systems
What sless does a typical person industrial final fina	Time consuming Complexity of analysis algorithms	Fear of losing data Costly hardware and software components	Collection of large set of data is time consuming Fruntation due to long duration of training of model	Failure due to technical issues Anger due to some error in results	Examining the false triggering and correcting it
Areas of opportunity How might we make each step better? What ideas do we have? What have others suggested?	Incressed brand loyalty Advertising the model to public	Betterment of accuracy in prediction Retrieval of Training and testing data	Designing light weight Web Application and Market Manager and Market Mar	Optimizing the AI Model with respect to real world environment	Maximizing the uptime of the Web App Service Examining the false triggering and correcting it
